SCHOLARSHIPS Available for the Master of Science in Electric Power Systems Engineering

Scholarships
Available for
Full-time
Students for
Fall 2012

Deadline is
March 19, 2012

Engineering the Smart Grid

Develop critical skills needed in a high demand field of engineering

- ⇒ **Ten month accelerated masters**
- ⇒ Courses in Power Systems, Generation, and Distribution, Power Electronics, Communications, Project Management and Professional Skills
- ⇒ Industry Support and Interaction:
 - Work with industry experts on real world projects giving you the cutting-edge career skills need in the workplace
 - Industry experts provide lectures giving you the inside perspective about the electric power engineering field
- ⇒ Gain training on Professional skills that are in demand by industry.
